

SFH

# SHAYNE FOX HARDWARE

PYRA SERIES INFORMATION SHEET.

---

## **THE STORY**

Started in 2017, with Shayne Fox at the helm, SFH aims to provide unique cast bronze hardware for all interior applications. The products we make are simple and solid, with clean lines, and feature soft tumbled surfaces. The subtle earthiness of the bronzes we use combined with the shapes, make our hardware well suited for transitional and modern spaces.

Within a few short months of our launch, our debut GEO series has been showcased in the NY NOW now trade show in NYC two times, a pop-up inside Toronto's original West Elm location, highlighted in both the print and online pages of AZURE and Designlines magazines and can be found adorning cabinetry and furniture in interiors across the globe.

The PYRA series is another exploration for us in cast bronze hardware, for interiors. We love the weight, and the surface subtleties that result when molten bronze is cooled in sand moulds and then hand finished. Inspired in part by ancient step pyramid architecture and the casting process itself, this series has sleeker and more elegant shapes than our debut GEO series. This is PYRA, a nod to the flame, the sun, dessert structures, and ancient processes with a modern aesthetic.

We have four shapes in the PYRA series and they consist of a knob, a 2" knob/hook, a 7" handle and a 12" handle. Currently we are offering them in both our bright golden bronze and our warm bronze (has a deeper, more coppery tone). The wares are unlacquered and feature a 'living finish' that will patina or darken over time. If the darkening is not preferred, the wares can be polished to promote the original lustre of the bronze.

Here are some photos of the PYRA series, specifications and pricing information.
